Question

Selecting an answer or writing down a short answer

After responding, the user sees the results of the poll

Voting results

Open-ended question

WordCloud button - turn off/on word cloud for voting results

Questions

Creating a question

By clicking on the Create New Question button, a small panel will appear where the user can write a question

For each question, choose the subject for which the question belongs

By clicking on the + and - button predefined questions can be added, for open questions the number of answers must be 0

Click the Create button to create a new question

Filtering questions

Selecting a subject from Subject will filter the questions by that subject

Click on the question to see the question with the current and archived answers, a 5 digit code and a QR code

Clicking the Archive button closes the question and archives it with the note entered by the user

Clicking the Duplicate button duplicates the question with the new codes

Clicking the Export button will export the question as a .json file

Click the Edit button to edit the question and the subject of the question

Clicking the Delete button will delete the question

Turning the WordCloud button on/off turns the word cloud on/off for the question

Filtered questions can be exported by clicking the Export button below the subject selection
